

Dringend empfohlener Sicherheitsbereich
Ø 1000 cm

Gesetzlich vorgeschriebener Sicherheitsbereich
Ø 700 cm

190 cm

The diagram illustrates safety zones around a central object. At the center is a circular object with a diameter of 190 cm, depicted with concentric circles and radial lines. Two concentric dashed circles represent safety zones: an inner circle with a diameter of 700 cm and an outer circle with a diameter of 1000 cm. The 1000 cm diameter zone is labeled as 'Dringend empfohlener Sicherheitsbereich' (urgently recommended safety zone), and the 700 cm diameter zone is labeled as 'Gesetzlich vorgeschriebener Sicherheitsbereich' (legally prescribed safety zone). Dashed lines also indicate the horizontal and vertical axes of the diagram.
